Professional Summary

Full-Stack AI Engineer with **7+ years** shipping production software end-to-end — from AI model orchestration and backend architecture to real-time user interfaces. Built and scaled platforms for enterprise clients across fintech (500K+ users), e-commerce, industrial IoT, and public-sector institutions. Deep expertise in LLM integration, RAG systems, Agentic AI, and Generative UI. Proven ability to operate as a **high-autonomy, founding-style engineer**: own the stack, ship fast, iterate in production. **66+ technical certifications** (AWS, Azure, Oracle, Google). Immediately available for UAE relocation.

Professional Experience

Independent AI Practice — 15+ Enterprise Engagements

Rome, Italy

Senior AI Engineer & Technical Architect

2018 – Present

End-to-end technical lead across 15+ enterprise engagements — owning architecture, implementation, deployment, and client delivery. Consistently operated as a high-autonomy, founding-style engineer. Directed cross-functional teams of 2–5 engineers. Client portfolio: **Tier-1 European FinTech** (500K+ users), **e-commerce platforms**, **industrial IoT manufacturers**, and **Italian public-sector cultural institutions**.

- **Full-Stack Platform Engineering**: Delivered 5+ enterprise dashboards and data platforms (React, Next.js, Redux, Context API) with high-performance backends (Python FastAPI, Django). Achieved **P95 API latency <800ms** via Redis caching, CDN optimization, and query tuning.
- **Multi-Agent AI Systems**: Architected a production multi-agent platform with autonomous AI agents rendering React components in real-time via LLM orchestration (LangChain, LangGraph, Vercel AI SDK). **Reduced feature development time by 40%**.
- **Institutional AI Deployment (Current)**: Architecting an AI-powered knowledge platform for six Italian cultural institutions with local-inference architecture, privacy-compliant deployment, structured backend services, and a cloud strategy designed for institutional expansion.
- **Enterprise RAG Architecture**: Designed and deployed hybrid RAG pipelines (vector search + BM25 + iterative disambiguation) processing 50K+ documents. **30% reduction in hallucination rate** on customer-facing AI assistants.
- **AI-Augmented Engineering**: Integrated agentic coding assistants into development workflows for implementation, debugging, code review, and automated test generation — reducing delivery cycle time across engagements.
- **Legacy System Modernization**: Led COBOL-to-Python migration of approximately 50K LOC using AI-assisted translation workflows. **Improved rewrite velocity by 60%**.
- **Cloud & Infrastructure**: Designed CI/CD pipelines (GitHub Actions), containerized deployments (Docker, Kubernetes), and cloud infrastructure on Azure and AWS. Applied OWASP standards and Terraform IaC.

Technical Skills

Full-Stack: Python, TypeScript, React / Next.js, FastAPI, Django, Node.js, Express, GraphQL, REST, Tailwind CSS

AI & GenAI: LLM Integration (OpenAI, Anthropic, Cohere), LangChain, LangGraph, Vercel AI SDK, RAG (Hybrid), Multi-Agent Orchestration, CrewAI, Generative UI, Prompt Engineering, LLMOps

Cloud & DevOps: AWS, Microsoft Azure, Docker, Kubernetes, GitHub Actions, Terraform, CI/CD

Databases: PostgreSQL, MongoDB, Pinecone, ChromaDB, Neo4j, TimescaleDB, Redis

Education

Università Unimercatorum

Italy

M.Sc. in Management Engineering — Digital Transformation, GPA: 27/30

Expected June 2026

- **Thesis:** Framework for Generative UI and embedding-free RAG — reducing computational cost and latency in enterprise AI systems.
- **Research:** 2 papers submitted to international peer-reviewed journals.

Università Niccolò Cusano

Italy

B.Sc. in Management Engineering (L-9)

2018 – 2021

Thesis on applied machine learning: K-Nearest Neighbors (KNN) algorithm for classification tasks.

Certifications (Selection from 66+)

AI & GenAI: AWS Generative AI Developer – Professional · Microsoft Azure AI Engineer · Oracle OCI Generative AI Professional · IBM Agentic AI (LangChain, LangGraph, CrewAI)

Data & DB: IBM Data Science Professional · MongoDB Associate Developer · Neo4j Certified Professional · Oracle AI Vector Search Professional

Security: Google Cybersecurity Professional · Microsoft Security Foundations

Complete list of 66+ certifications available at: github.com/giulio-leone/cv

Languages

Italian: Native speaker

English: C1 — Advanced

Daily professional use in international projects
