

Giulio Leone | Senior AI Engineer — Generative AI, LLM Systems & Agentic Architecture

Rome, Italy – Relocating to UAE (Dubai / Abu Dhabi) — Immediately Available

☎ +39 366 141 0914 • ✉ giulioleone097@gmail.com • 🌐 giulioleone.com

in giulioleone1 • 📞 WhatsApp / 📧 Telegram available

Professional Summary

AI Engineer with **7+ years** building production Generative AI systems for enterprise clients. Core expertise: **multi-agent orchestration**, **RAG architectures**, **LLM systems**, and **Agentic AI** — deployed at scale for a Tier-1 European FinTech (500K+ users), industrial IoT manufacturers, and institutional organizations. Full-stack delivery (Python, TypeScript, React/Next.js) enabling end-to-end product ownership. **66+ certifications** including AWS Generative AI Developer Professional and Microsoft Azure AI Engineer. M.Sc. in Management Engineering (Digital Transformation). EU citizen, immediately available for UAE relocation.

Professional Experience

Independent AI Practice — 15+ Enterprise Engagements

Rome, Italy

Senior AI Engineer & Technical Architect

2018 – Present

Directed AI architecture, full-stack platform delivery, and systems engineering across 15+ enterprise engagements. Led cross-functional teams of 2–5 engineers. Client portfolio: **Tier-1 European FinTech** (500K+ users), **e-commerce platforms**, **industrial IoT manufacturers**, and **Italian public-sector cultural institutions**.

- **Multi-Agent AI Systems:** Architected a production multi-agent platform with autonomous AI agents rendering React components in real-time via LLM orchestration (LangChain, LangGraph, Vercel AI SDK). Implemented tool-use patterns, streaming responses, and fallback handling. **Reduced feature development time by 40%.**
- **Enterprise RAG Architecture:** Designed and deployed hybrid RAG pipelines (vector search + BM25 + iterative disambiguation) processing 50K+ enterprise documents. Achieved **30% reduction in hallucination rate** on customer-facing AI assistants.
- **Institutional AI Deployment (Current):** Directing the AI systems architecture for a government-adjacent cultural technology initiative across six Italian museums. Designed local-inference, API, and data architecture for privacy-first institutional deployment. Pilot engagement with national distribution potential — positioned as the foundational technical delivery.
- **Full-Stack Platform Engineering:** Delivered 5+ enterprise dashboards and data platforms (React, Next.js, Redux) with high-performance backends (Python FastAPI, Django). Achieved **P95 API latency <800ms** via Redis caching and CDN optimization.
- **Legacy System Modernization:** Led COBOL-to-Python migration of approximately 50K LOC using AI-assisted translation workflows. Designed the migration pipeline and validation framework. **Improved rewrite velocity by 60%.**
- **AI-Augmented Engineering:** Integrated agentic coding assistants into development workflows for implementation, debugging, code review, and automated test generation — reducing delivery cycle time across engagements.
- **Cloud & Infrastructure:** Architected CI/CD pipelines (GitHub Actions), containerized deployments (Docker, Kubernetes), and cloud infrastructure on Azure and AWS. Applied OWASP security standards and infrastructure-as-code (Terraform).

Technical Skills

AI & GenAI: LLM Integration (OpenAI, Anthropic, Cohere), LangChain, LangGraph, Vercel AI SDK, RAG (Vector + BM25 Hybrid), Multi-Agent Orchestration, CrewAI, Generative UI, Prompt Engineering, LLMops, AI Evaluation & Guardrails

Full-Stack: Python, TypeScript, React / Next.js, FastAPI, Django, Node.js, Express, GraphQL, REST, Tailwind CSS

Cloud & DevOps: AWS, Microsoft Azure, Docker, Kubernetes, GitHub Actions, Terraform, CI/CD
Databases: PostgreSQL, MongoDB, Pinecone, ChromaDB, Neo4j, TimescaleDB, Redis

Education

Università Unimercuratorum

Italy

M.Sc. in Management Engineering — Digital Transformation, GPA: 27/30 *Expected June 2026*

- **Thesis:** Framework for Generative UI and embedding-free RAG — reducing computational cost and latency in enterprise AI systems.
- **Research:** 2 papers submitted to international peer-reviewed journals.

Università Niccolò Cusano

Italy

B.Sc. in Management Engineering (L-9)

2018 – 2021

Thesis on applied machine learning: K-Nearest Neighbors (KNN) algorithm for classification tasks.

Certifications (Selection from 66+)

AI & GenAI: AWS Generative AI Developer – Professional · Microsoft Azure AI Engineer · Oracle OCI Generative AI Professional · IBM Agent AI (LangChain, LangGraph, CrewAI) · Oracle AI Agent Studio

Data & ML: IBM Data Science Professional · Oracle OCI Data Science Professional · Neo4j Graph Data Science · Google Data Analytics

Database: MongoDB Associate Developer · Oracle AI Vector Search Professional · Neo4j Certified Professional

Security: Google Cybersecurity Professional · Microsoft Security Foundations · Oracle OCI Foundations

Complete list of 66+ certifications available at: github.com/giulio-leone/cv

Languages

Italian: Native speaker

English: C1 — Advanced

Daily professional use in international projects
