Professional Summary

Platform Engineer with **7+ years** designing AI-powered systems, developer tools, and production infrastructure. Expertise spanning **LLM orchestration**, **RAG pipelines**, **multi-agent frameworks**, and full-stack platform delivery (Python, TypeScript, React/Next.js). Track record of building scalable solutions for Tier-1 FinTech clients, enterprise knowledge systems, and institutional AI deployments. Strong focus on **developer experience**, **API design**, and **cloud-native architecture** (AWS, Azure, Docker, Kubernetes). **66+ certifications** across AI, cloud, and data engineering. EU citizen, open to UAE visa sponsorship.

Professional Experience

Independent AI Practice — 15+ Enterprise Engagements

Rome, Italy

Senior AI Engineer & Technical Architect

2018 – Present

Technical lead for platform architecture, API design, and AI systems engineering across 15+ enterprise engagements. Directed cross-functional teams of 2–5 engineers. Client portfolio: **Tier-1 European FinTech** (500K+ users), **e-commerce platforms**, **industrial IoT manufacturers**, and **Italian public-sector cultural institutions**.

- **Full-Stack Platform Engineering:** Delivered 5+ enterprise dashboards and data platforms (React, Next.js, Redux) with high-performance backends (Python FastAPI, Django). Achieved **P95 API latency <800ms** via Redis caching, CDN optimization, and query tuning.
- **Enterprise RAG Architecture:** Designed and deployed hybrid RAG pipelines (vector search + BM25 + iterative disambiguation) processing 50K+ enterprise documents. Achieved **30% reduction in hallucination rate** on customer-facing AI assistants.
- **Multi-Agent AI Systems:** Architected a production multi-agent platform with autonomous AI agents rendering React components in real-time via LLM orchestration (LangChain, LangGraph, Vercel AI SDK). Implemented tool-use patterns, streaming, and fallback handling. **Reduced feature development time by 40%.**
- **Institutional AI Deployment (Current):** Architecting an AI-powered knowledge platform for six Italian cultural institutions with local-inference architecture, privacy-compliant deployment, structured backend services, and a cloud strategy designed for institutional expansion.
- **Cloud & Infrastructure:** Designed CI/CD pipelines (GitHub Actions), containerized deployments (Docker, Kubernetes), and cloud infrastructure on Azure and AWS. Applied OWASP security standards, infrastructure-as-code practices (Terraform), and monitoring.
- **Legacy System Modernization:** Led COBOL-to-Python migration of approximately 50K LOC using AI-assisted translation workflows. **Improved rewrite velocity by 60%.**
- **AI-Augmented Engineering:** Integrated agentic coding assistants into development workflows for implementation, debugging, code review, and automated test generation — reducing delivery cycle time.

Technical Skills

Cloud & DevOps: AWS, Microsoft Azure, Docker, Kubernetes, GitHub Actions, Terraform, CI/CD, Infrastructure-as-Code

AI & GenAI: LLM Integration (OpenAI, Anthropic, Cohere), LangChain, LangGraph, Vercel AI SDK, RAG (Hybrid), Multi-Agent Orchestration, CrewAI, LLMOps, AI Evaluation & Guardrails

Full-Stack: Python, TypeScript, React / Next.js, FastAPI, Django, Node.js, Express, GraphQL, REST

Databases: PostgreSQL, MongoDB, Pinecone, ChromaDB, Neo4j, TimescaleDB, Redis

Education

Università Unimercatorum

Italy

M.Sc. in Management Engineering — Digital Transformation, GPA: 27/30 *Expected June 2026*

- **Thesis:** Framework for Generative UI and embedding-free RAG — reducing computational cost and latency in enterprise AI systems.
- **Research:** 2 papers submitted to international peer-reviewed journals.

Università Niccolò Cusano

Italy

B.Sc. in Management Engineering (L-9)

2018 – 2021

Thesis on applied machine learning: K-Nearest Neighbors (KNN) algorithm for classification tasks.

Certifications (Selection from 66+)

Cloud: AWS Generative AI Developer – Professional · Microsoft Azure AI Engineer · Oracle OCI Foundations · Oracle OCI Data Science Professional

AI & GenAI: Oracle OCI Generative AI Professional · IBM Agent AI (LangChain, LangGraph, CrewAI) · Oracle AI Agent Studio

Data & DB: MongoDB Associate Developer · Neo4j Certified Professional · Oracle AI Vector Search Professional · Neo4j Graph Data Science

Security: Google Cybersecurity Professional · Microsoft Security Foundations

Complete list of 66+ certifications available at: github.com/giulio-leone/cv

Languages

Italian: Native speaker

English: C1 — Advanced

Daily professional use in international projects
