

Giulio Leone

Senior AI Engineer | Generative AI, LLM Systems & Agentic Architecture

Rome, Italy | Relocating to UAE (Dubai / Abu Dhabi) | Immediately Available
+39 366 141 0914 | giulioleone097@gmail.com | giulioleone.com | linkedin.com/in/giulioleone1
v4.0.0 | Last updated: March 23, 2026

PROFESSIONAL SUMMARY

AI Engineer with **7+ years** building production Generative AI systems for enterprise clients. Core expertise: **multi-agent orchestration**, **RAG architectures**, **LLM systems**, and **Agentic AI** | deployed at scale for a Tier-1 European FinTech (500K+ users), industrial IoT manufacturers, and institutional/public-sector organizations. Full-stack delivery capability (Python, TypeScript, React/Next.js) enabling end-to-end product ownership from model orchestration to production UI. **66+ certifications** including AWS Generative AI Developer Professional and Microsoft Azure AI Engineer. M.Sc. in Management Engineering (Digital Transformation). EU citizen, immediately available for UAE relocation.

PROFESSIONAL EXPERIENCE

Senior AI Engineer & Technical Consultant

Jan 2020 – Present

Independent AI Consultancy | 15+ Enterprise Engagements

Rome, Italy

Technical lead for AI architecture, full-stack platform delivery, and systems engineering across 15+ enterprise engagements. Directed cross-functional teams of 2–5 engineers. Client portfolio: **Tier-1 European FinTech** (500K+ users), **mid-market e-commerce platforms**, **industrial IoT manufacturers**, and **Italian public-sector cultural institutions**.

- **Multi-Agent AI Systems:** Architected a production multi-agent platform with autonomous AI agents rendering React components in real-time via LLM orchestration (LangChain, LangGraph, Vercel AI SDK). Implemented tool-use patterns, streaming responses, and fallback handling. **Reduced feature development time by 40%.**
- **Enterprise RAG Architecture:** Designed and deployed hybrid RAG pipelines (vector search + BM25 + iterative disambiguation) processing 50K+ enterprise documents. Achieved **30% reduction in hallucination rate** on customer-facing AI assistants.
- **Institutional AI Deployment (Current):** Supporting a public-sector cultural pilot involving six museums in the Italian institutional museum system, with planned expansion across additional museums and partner platforms. Leading technical work across local-inference AI strategy, non-closed model approaches, backend/API architecture, database design, cloud infrastructure planning, and structured technical documentation. Contributing to a controlled, privacy-aware deployment model designed for institution-oriented adoption, combining software delivery, architecture design, and implementation support in a multi-phase consulting engagement.
- **Full-Stack Platform Engineering:** Delivered 5+ enterprise dashboards and data platforms (React, Next.js, Redux) with high-performance backends (Python FastAPI, Django). Achieved **P95 API latency <800ms** via Redis caching and CDN optimization.
- **Legacy System Modernization:** Led COBOL-to-Python migration of approximately 50K LOC

using AI-assisted translation workflows. Designed the migration pipeline and validation framework. **Improved rewrite velocity by 60%.**

- **AI-Augmented Engineering:** Integrated agentic coding assistants into development workflows for implementation, debugging, code review, and automated test generation | reducing delivery cycle time across engagements.
- **Cloud & Infrastructure:** Designed CI/CD pipelines (GitHub Actions), containerized deployments (Docker, Kubernetes), and cloud infrastructure on Azure and AWS. Applied OWASP security standards and infrastructure-as-code practices (Terraform).

Full-Stack Developer

Freelance

Jan 2018 – Dec 2019

Rome, Italy

Started career building web applications and delivering end-to-end solutions for small business clients.

- Built 8+ client projects: responsive web applications (JavaScript, HTML/CSS, PHP), REST APIs (Node.js), and database-driven backends (MySQL, PostgreSQL).
- Managed full project lifecycle from requirements gathering through deployment and maintenance.
- Developed strong foundations in software architecture and client communication that enabled transition to AI-focused engineering.

TECHNICAL SKILLS

- **AI & GenAI:** LLM Integration (OpenAI, Anthropic, Cohere), LangChain, LangGraph, Vercel AI SDK, RAG (Vector + BM25 Hybrid), Multi-Agent Orchestration, CrewAI, Generative UI, Prompt Engineering, LLMOps, AI Evaluation & Guardrails
- **Full-Stack:** Python, TypeScript, React / Next.js, FastAPI, Django, Node.js, Express, GraphQL, REST, Tailwind CSS
- **Cloud & DevOps:** AWS, Microsoft Azure, Docker, Kubernetes, GitHub Actions, Terraform, CI/CD
- **Databases:** PostgreSQL, MongoDB, Pinecone, ChromaDB, Neo4j, TimescaleDB, Redis

EDUCATION

M.Sc. in Management Engineering | Digital Transformation

Università Unimercatorum

GPA: 27/30

Expected June 2026

Italy

- **Thesis:** Framework for Generative UI and embedding-free RAG | reducing computational cost and latency in enterprise AI systems.
- **Research:** 2 papers submitted to international peer-reviewed journals.

B.Sc. in Management Engineering (L-9)

Università Niccolò Cusano

Thesis on applied machine learning: K-Nearest Neighbors (KNN) algorithm for classification tasks.

2018 – 2021

Italy

CERTIFICATIONS

- **AI & GenAI:** AWS Generative AI Developer – Professional | Microsoft Azure AI Engineer | Oracle OCI Generative AI Professional | IBM Agentic AI (LangChain, LangGraph, CrewAI) | Oracle AI Agent Studio
- **Data & ML:** IBM Data Science Professional | Oracle OCI Data Science Professional | Neo4j Graph Data Science | Google Data Analytics
- **Database:** MongoDB Associate Developer | Oracle AI Vector Search Professional | Neo4j Certified Professional
- **Security:** Google Cybersecurity Professional | Microsoft Security Foundations | Oracle OCI Foundations
- *Complete list of 66+ certifications available at: <https://github.com/giulio-leone/cv>*

LANGUAGES

- **Italian:** Native speaker
- **English:** C1 | Advanced (Daily professional use in international projects)
